IT Plan, Inc
St. Petersburg, Russia
To Mr. Yury Nikiforov

Feedback on Cooperation with IT Plan

AD Biotech Solutions, Inc. is one of the leading pharmaceutical distributors with a high dynamic of development. Our company specializes in working directly with large international clients to supply chemical and biological reagents and media, consumables and medical devices and in the US and foreign countries.

At the beginning of 2018, we faced an accelerated growth in the volume of purchased and sold products. This resulted in an immediate need of automating several aspects of the warehouse management and accounting while transitioning from an existing system. IT Plan was chosen as a partner in the joint implementation of warehouse management system and as a general consultant in the process.

The partner was given the following tasks.

- To implement planning and control of the company's inventory circulation
- To provide us with the ability to track the movement of goods at any time, real-time control of inventory (physical location in the warehouse, stock on-hand, lots, expiration, allocation to customer, etc.)
- To ensure a proper and straightforward creation of financial, purchasing and shipping documents and reports based on the information in the system
- To reduce time for warehouse operations
- To reduce incidents of accounting errors due to human factors

Based on the results of joint work, by September 2018, a WMS was launched at the warehouse and the following results were achieved:

- Implemented an order system in warehouse accounting
- Implemented an address system for inventory tracking within the warehouse
- Implemented a barcoding process for individual product packaging with unique labels
- Implemented the use of DCT for Acceptance / Shipment / Inventory movement
- Implemented the use of DCT for the creation and printing of packing lists
- Implemented the use of DCT for the operation repackaging of goods and materials
- Implemented the control of the documentation of warehouse and financial operations

All this allowed the company to solve the outlined tasks. AD Biotech Solutions notes the high level of qualification of consultants and developers of IT Plan. We would like to note their high accessibility and fast response rate for training and all adjustments to the system after the initial implementation. We value the quality of the services provided by IT Plan Co. Ltd and plan to continue cooperation with this company in the future.

Sincerely,

Jessica Campbell
CEO, AD Biotech Solutions, Inc.
